

BP, Chertsey Road, Sunbury on Thames

Project Description

- Removal of furniture, suspended ceilings and associated M&E
 - Isolation of power to fan coil units
- Removal and replacement of existing fan coil units
 - Associated duct work
 - BMS modifications
- Reinstatement of services, ceilings, furniture and IT systems

Our first project for UK oil giant BP was to replace existing fan coil units on the ground, second and third floors of their regional office in Sunbury Business Park. The project was completed in occupied space requiring careful planning and organisation to ensure BP's ongoing operations were not disrupted.

Duration 12 weeks

Value £300k
