This 1930's, grade II listed former Granada Cinema has been modernised, refurbished and adapted whilst repairing and retaining many of the existing features of the original pre-war cinema. The newly converted church has a capacity of 2,500 and with Henley Homes new 'Lumier' apartments recently built above, noise reduction was an important consideration when adapting this space. Through a range of acoustic treatments NR 35DB was achieved.

Duration 60 weeks

Value £5.5m
